

## 2024 PROSPECTIVE MCE GREEN ACCESS PRODUCT CONTENT LABEL <sup>1</sup>

Green Access matches 100% of your electricity usage. In 2024, Green Access will be made up of the following new renewable resources averaged annually.

Green-e® Energy Certified New <sup>2</sup> Renewables in Green Access 2024		Generation Location
-Biomass	0%	
-Geothermal	0%	
-Low impact hydroelectric <sup>3</sup>	0%	
-Solar	100%	California
-Wind	0%	
<b>Total Green-e® Energy Certified New Renewables</b>	<b>100%</b>	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

3. Eligible hydroelectric facilities are defined in the Green-e® Renewable Energy Standard for Canada and the United States (<http://www.green-e.org/standard>) and include facilities certified by the Low Impact Hydropower Institute (LIHI) ([www.lowimpacthydro.org](http://www.lowimpacthydro.org)) or EcoLogo ([www.ecologo.org](http://www.ecologo.org)); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying PG&E includes: Coal (0%), Nuclear (49%), Oil (0%), Natural Gas (5%), Hydroelectric (8%), and Other (0%). This resource mix was prepared in accordance with the California Energy Commission.

The average home in California uses 535 kWh per month. Source: U.S. EIA, 2022
